**BY EMAIL ONLY**

Dear Kate Edwards,

**Planning consultation:** Erection of 2 buildings comprising over 4000sqm of floor space up to 4 storeys in height to provide student accommodation with associated landscaping & associated works together with a car park of 77 spaces.

**Location:** Land South Of Daviesites, Charterhouse, Queens Drive, Godalming.

Thank you for your consultation on the above dated 04 April 2019 which was received by Natural England on the same day.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

**SUMMARY OF NATURAL ENGLAND'S ADVICE**

**NO OBJECTION - SUBJECT TO APPROPRIATE MITIGATION BEING SECURED**

We consider that without appropriate mitigation the application would have an adverse effect on the integrity of the Thursley, Hankley & Frensham Commons Special Protection Area (SPA) (Wealden Heaths SPA), specifically Thursley, Hankley & Frensham Commons Site of Special Scientific Interest (SSSI). Also Charterhouse to Eashing SSSI may be adversely affected.

In order to mitigate these adverse effects and make the development acceptable, the following mitigation measures are required:

- Permeable paving should be used for the car parking bays so that water can percolate into the ground as mentioned in the 'Civil Engineer's Drainage and SUDS Strategy Report' (December 2018);
- Surface water from the buildings should be infiltrated to the ground via soakaways so that it is not directed to the sewerage system as mentioned in the 'Civil Engineer's Drainage and SUDS Strategy Report' (December 2018);
- Foul water from the site should be directed to a public sewerage system as mentioned in the 'Civil Engineer's Drainage and SUDS Strategy Report' (December 2018); and
- Student accommodation should be for school use only and should not be permanent accommodation.

We advise that an appropriate planning condition or obligation is attached to any planning permission to secure these measures.

Natural England's advice on other natural environment issues is set out below.

### Further advice on mitigation

- The application site is within close proximity of Charterhouse to Eashing SSSI and therefore the proposed increase in built development on the application site has the potential to impact negatively on the hydrology of this site. This is why we advise SuDs are implemented which will allow surface water to percolate through to the ground rather than being directed to a sewerage system. SuDs will need to be managed in perpetuity to ensure their effectiveness.
- In terms of the SPA, if the proposed application was for permanent accommodation and/or for public use, it is Natural England's view that the planning authority will not be able to ascertain that this proposed development would not adversely affect the integrity of the SPA. In combination with other plans and projects, the development would be likely to contribute to a deterioration of the quality of the habitat on which Annex 1 birds depend and increased disturbance to the bird species for which the SPA is classified, by reason of increased access to the heath including access for general recreation and dog-walking. Therefore we recommend our advice above is adhered to and an appropriate planning condition or obligation is attached to any planning permission to secure these measures.

Please note that if your authority is minded to grant planning permission contrary to the advice in this letter, you are required under Section 281 (6) of the Wildlife and Countryside Act 1981 (as amended) to notify Natural England of the permission, the terms on which it is proposed to grant it and how, if at all, your authority has taken account of Natural England's advice. You must also allow a further period of 21 days before the operation can commence.

### Other advice

Further general advice on consideration of protected species and other natural environment issues is provided at Annex A.

Should the developer wish to discuss the detail of measures to mitigate the effects described above with Natural England, we recommend that they seek advice through our [Discretionary Advice Service](#).

If you have any queries relating to the advice in this letter please contact me on 02078955424 or at [victoria.huth@naturalengland.org.uk](mailto:victoria.huth@naturalengland.org.uk)

Should the proposal change, please consult us again.

Yours sincerely,

Victoria Huth  
Thames Team  
Sustainable Development

## Annex A – Additional advice

Natural England offers the following additional advice:

### Landscape

Paragraph 170 of the National Planning Policy Framework (NPPF) highlights the need to protect and enhance valued landscapes through the planning system. This application may present opportunities to protect and enhance locally valued landscapes, including any local landscape designations. You may want to consider whether any local landscape features or characteristics (such as ponds, woodland or dry stone walls) could be incorporated into the development in order to respect and enhance local landscape character and distinctiveness, in line with any local landscape character assessments. Where the impacts of development are likely to be significant, a Landscape & Visual Impact Assessment should be provided with the proposal to inform decision making. We refer you to the [Landscape Institute](#) Guidelines for Landscape and Visual Impact Assessment for further guidance.

### Protected Species

Natural England has produced [standing advice](#)<sup>1</sup> to help planning authorities understand the impact of particular developments on protected species. We advise you to refer to this advice. Natural England will only provide bespoke advice on protected species where they form part of a SSSI or in exceptional circumstances.

### Local sites and priority habitats and species

You should consider the impacts of the proposed development on any local wildlife or geodiversity sites, in line with paragraph 174 of the NPPF and any relevant development plan policy. There may also be opportunities to enhance local sites and improve their connectivity. Natural England does not hold locally specific information on local sites and recommends further information is obtained from appropriate bodies such as the local records centre, wildlife trust, geoconservation groups or recording societies.

Priority habitats and Species are of particular importance for nature conservation and included in the England Biodiversity List published under section 41 of the Natural Environment and Rural Communities Act 2006. Most priority habitats will be mapped either as Sites of Special Scientific Interest, on the Magic website or as Local Wildlife Sites. List of priority habitats and species can be found [here](#)<sup>2</sup>. Natural England does not routinely hold species data, such data should be collected when impacts on priority habitats or species are considered likely. Consideration should also be given to the potential environmental value of brownfield sites, often found in urban areas and former industrial land, further information including links to the open mosaic habitats inventory can be found [here](#).

### Ancient woodland and veteran trees

You should consider any impacts on ancient woodland and veteran trees in line with paragraph 175 of the NPPF. Natural England maintains the Ancient Woodland [Inventory](#) which can help identify ancient woodland. Natural England and the Forestry Commission have produced [standing advice](#) for planning authorities in relation to ancient woodland and veteran trees. It should be taken into account by planning authorities when determining relevant planning applications. Natural England will only provide bespoke advice on ancient woodland/veteran trees where they form part of a SSSI or in exceptional circumstances.

### Environmental enhancement

Development provides opportunities to secure a net gain for nature and local communities, as outlined in paragraphs 8, 32 and 170 of the NPPF. We advise you to follow the mitigation hierarchy as set out in paragraph 175 of the NPPF and firstly consider what existing environmental features on and around the site can be retained or enhanced or what new features could be incorporated into the development proposal. Where onsite measures are not possible, you may wish to consider off site measures, including sites for biodiversity offsetting. Opportunities for enhancement might include:

---

<sup>1</sup> <https://www.gov.uk/protected-species-and-sites-how-to-review-planning-proposals>

<sup>2</sup> <http://webarchive.nationalarchives.gov.uk/20140711133551/http://www.naturalengland.org.uk/ourwork/conservation/biodiversity/protectandmanage/habsandspeciesimportance.aspx>

- Providing a new footpath through the new development to link into existing rights of way.
- Restoring a neglected hedgerow.
- Creating a new pond as an attractive feature on the site.
- Planting trees characteristic to the local area to make a positive contribution to the local landscape.
- Using native plants in landscaping schemes for better nectar and seed sources for bees and birds.
- Incorporating swift boxes or bat boxes into the design of new buildings.
- Designing lighting to encourage wildlife.
- Adding a green roof to new buildings.

You could also consider how the proposed development can contribute to the wider environment and help implement elements of any Landscape, Green Infrastructure or Biodiversity Strategy in place in your area. For example:

- Links to existing greenspace and/or opportunities to enhance and improve access.
- Identifying opportunities for new greenspace and managing existing (and new) public spaces to be more wildlife friendly (e.g. by sowing wild flower strips)
- Planting additional street trees.
- Identifying any improvements to the existing public right of way network or using the opportunity of new development to extend the network to create missing links.
- Restoring neglected environmental features (e.g. coppicing a prominent hedge that is in poor condition or clearing away an eyesore).

### **Access and Recreation**

Natural England encourages any proposal to incorporate measures to help improve people's access to the natural environment. Measures such as reinstating existing footpaths together with the creation of new footpaths and bridleways should be considered. Links to other green networks and, where appropriate, urban fringe areas should also be explored to help promote the creation of wider green infrastructure. Relevant aspects of local authority green infrastructure strategies should be delivered where appropriate.

### **Rights of Way, Access land, Coastal access and National Trails**

Paragraph 98 of the NPPF highlights the important of public rights of way and access. Development should consider potential impacts on access land, common land, rights of way and coastal access routes in the vicinity of the development. Consideration should also be given to the potential impacts on the any nearby National Trails. The National Trails website [www.nationaltrail.co.uk](http://www.nationaltrail.co.uk) provides information including contact details for the National Trail Officer. Appropriate mitigation measures should be incorporated for any adverse impacts.

### **Biodiversity duty**

Your authority has a [duty](#) to have regard to conserving biodiversity as part of your decision making. Conserving biodiversity can also include restoration or enhancement to a population or habitat. Further information is available [here](#).
